

Ilya Fedorov

New Zealand, Auckland

+64 21 071 0620

ilya.fedorov@gmail.com

Summary:

- Avid proponent and advocate for enabling remote work options for people
- 5+ years of experience in building and supporting passionate and high performing agile teams (distributed and on-site)
- 18+ years of hands-on experience in business and system analysis, software design and development
- Natural empathy, ability to mentor and support team members, create professional development paths, fostering engagement, motivation and wellbeing
- Proven ability to hire and coach teams to mature development practices to continuously improve alignment, efficiency and quality, technical discussion making, and conflict resolution
- Strong advocate for best engineering practices like TDD, CI/CD, Infrastructure as a code, shifting quality to left, pair and mob programming, agile, data-driven experiments
- Confident communicator, capable of translating business requirements into system solutions, creating and maintaining trustful relationships with executive teams, business stakeholders, and customers.
- Strong prioritization, expectation management and risk management skills

Qualifications:

- Postgraduate Diploma in Information Technology and Computer Science (Auckland University of Technology)
- Postgraduate Diploma in Business Analysis (Russian Academy of National Economy)
- Master of Applied Physics and Mathematics (Moscow Institute of Physics and Technology)

Experience:

Aug 2019 – Apr 2020 (Contract)

Engineering manager

Serko

Expense and travel product company

Landscape:

- Rapid expansion to new markets - Serko's two travel products own 70% market share in Australasia and are rapidly expanding to the North American market. To achieve the growth some quality compromises had been made that hinder future growth at present.
- Rapid team upskilling - engineering team grew from 30 to 130 people in 18 months and continues to grow. We work in an environment where teams have very limited domain expertise. We use tools like pair programming and mobbing to rapidly upskill developers and ensure the quality of code.
- Legacy architecture - the core of the system presents a monolith, which makes it challenging to respond in a timely fashion to our clients' change requests. Teams are geared to split the core to micro slices.
- "Build it and own it" culture - every team owns a slice of application, meaning they are responsible for full software life cycle - development, release and customer support.

Responsibilities:

People Leadership:

- Fostering a safe and productive environment for teams (can-do attitude, mutual support, fail fast, learn from mistakes, manage risks, seek opportunities to innovate, seek feedback)
- Working with teams to stabilize the product (create visibility of production issues, remove the fear of deployment, raise the maturity of development practices, improving code quality).
- Collaborating with the product team to define roadmaps and manage customer expectations
- Taking part in shifting company-wide culture from "startup" to "growth" mentality, realigning team structure to product and business objectives, modernizing architecture of the product
- Interviewing new talents

Technical Leadership:

- Creating architecture proposals, and communicating such within the organisation
- Communicating expectations related to product performance, reliability, and security
- Promoting tools like TDD, CI/CD, Infrastructure as a code, shifting quality to left, pair and mob programming, scrum
- Reviewing solution design against technical vision and redirecting delivery teams where necessary
- Conceiving strategies to counter product technical debt

Technology stack:

- React/Redux, HTML5, CSS3
- Javascript/Typescript, Node.js, c# .Net
- Azure Cloud, Azure Devops, App Insights, SQL Server
- LUIS, Uneeq (digitalhumans.com)

Oct 2017 – Aug 2019 (Contract)

Development manager

Propellerhead.

Software development house

Landscape:

- Various client background (government, commercial, startups) makes it important to pick the right collaboration style
- Rapidly changing priorities and limited development resource
- A multitude of third-party vendors (local and overseas)
- Collaboration between on-site and geographically distributed teams

Responsibilities:

Product Development:

- Working with client stakeholders to define product vision and product roadmap
- Collaborating with the client to prioritise product deliverables
- Drafting and prioritising user stories for the product backlog
- Liaising with client stakeholders - communicating product vision and progress towards that vision
- Managing expectations, coordinating deliverables with numerous vendors
- Managing multiple geographically distributed teams

Technical Leadership:

- Developing product architecture and technical vision, and communicating such both within the organisation and to clients
- Communicating expectations related to product performance, reliability, and security
- Improving delivery team quality through the establishment and maintenance of technical practices
- Reviewing solution design against technical vision and redirecting delivery teams where necessary
- Conceiving strategies to counter product technical debt
- Collaborating with partners and managing development resource

Technology stack:

- Azure, AWS
- React/Redux, HTML5, CSS3
- JavaScript/TypeScript, Node.js, c#.Net
- mySQL, MongoDB, Azure Tables, Cosmos DB
- Auth0

Jan 2015 – Oct 2017

Co-founder/ Head of Development

schooltalk.co.nz

Learning management platform

Responsibilities:

Product Development:

- Perform market research and market validation of the product
- Work in a consultative fashion with domain experts and define the product requirements
- Identify, shape and prioritize product features
- Identify, prototype and prioritize technologies, platforms and third-party services most suitable to meet product requirements
- Identify funding opportunities and prepare grant documentation
- Participate in front-end and back-end development
- Perform testing, deployment and support tasks
- Create and conduct end-user and pre-sales presentations

Project Leadership:

- Lead time and cost estimation to provide realistic delivery forecast

- Assess risks before production releases and patches
- Manage the development team using Agile methodologies to ensure the quality of software and timely delivery
- Organize regular demonstrations of in-sprint progress
- Participate in defining solution architecture
- Supervise implementation process
- Interviewing and hiring new team members

Technology stack:

- JavaScript, React.JS, Loki.JS, Ajax, jQuery, HTML5, CSS3, Google Material Design
- C#, ASP.Net MVC 5, Entity Framework, Azure App Services and Web Jobs, AWS Lambda functions
- OWIN Authentication, Google Drive and Google Directory Integration
- SQL Server, T-SQL, Azure Blob Storage and Table Storage

Apr 2013 – Jan 2015

Senior Full-Stack Software Developer

Fraedom.com

*Total Transaction Management
A technology partner of VISA*

Technical skills used:

- C#/ VB.Net, ASP.Net MVC 4, CSS3, HTML5, jQuery, JavaScript, Ajax
- WCF, ASP.Net Web services
- SVN, nHibernate, T-SQL, SQL Server
- Scrum methodology

Worked on Total Travel and Expense Solution, contributed in the following:

- Created Web Applications and Web Services
- Implemented Single Sign-On mechanisms with trusted parties
- Integrated with third-party Web Services using public APIs
- Developed data schemas and stored procedures
- Created technical documentation, wrote "how-to" development articles
- Coached new team members, performed code reviews
- Assisted deployment to production environments
- Suggested architectural solutions and did the pre-grooming analysis on tasks

Nov 2007 – Mar 2013

Senior Analyst-Programmer

Freightways

*New Zealand Couriers, DX MAIL,
Post Haste, Pass the Parcel, Castle Parcels*

Responsibilities:

Business Analyst Capacity:

- Interviewed stakeholders
- Documented business processes, defined business and system requirements
- Engaged with key users to prepare system specification
- Prepared user training materials
- Presented the systems to stakeholders and end-users
- Run user training sessions

Software Developer Capacity:

- Defined business and system requirements, created solution documentation, defined approaches for implementation, evaluated and selected the most suitable one.
- Created architectural plans outlining the structure of the new software application.
- Worked out the project schedule, distributed tasks over developers, reported to senior management about the course of the project, kept records for audit and customer billing.
- Mentored junior developers.
- Created Click-Once and Web applications, Web and Windows services.
- Developed data schemas and stored procedures, performed data migration.
- Tested, deployed and supported developed solutions.
- Integrated applications with third-party payment and authentication services
- Presented the systems to stakeholders and end-users, created user manuals for the systems deployed.

Technical skills used:

- C#/ VB.Net - .Net Framework 3.5, 4.0
- ASP.Net MVC 4, CSS3, HTML5, jQuery, JavaScript, Ajax
- WCF, ASP.Net Web services, Windows services
- TFS
- ORACLE 10g, SQL Server

Developed core frameworks:

- User Access Control
- Graphical User Interface
- Job Execution Engine

Carried out the following major projects:

- Redesign of core Track and Trace services
- <http://www.nzcouriers.co.nz/redelivery/cardleft.html>
- <http://www.posthaste.co.nz/redelivery/cardleft.html>
- <http://www.castleparcels.co.nz/redelivery/cardleft.html>
- Courier Cards Software Package
- In-Depot Consignment Scanning
- Australia Post Returns Management
- Debtors Ledger Transaction Posting and End-of-Period Jobs

Participated as a part of the team in the following projects:

- <http://www.passtheparcel.co.nz/Card>
- Call Centre
- Booking System

Supervised junior developers in the following projects:

- Billing
- System Messaging and Invoice Deliver

Feb 2006 – Nov 2007*Senior Analyst-Programmer***Thor United (Russia/USA)***Investment Company***Responsibilities:****Business Analyst Capacity:**

- Interviewed stakeholders
- Documented business processes
- Engaged with key users to prepare system specification
- Prepared user training materials
- Run user training sessions

Software Developer Capacity:

- Worked out the design specifications and wrote functional requirements for new information system
- Created architectural plans outlining the structure of new software application
- Developed data and business object layers
- Developed SQL Server data schema
- Performed data migration from the legacy system
- Deployed environment for a distributed team of developers
- Worked out the project schedule, distributed tasks over developers, reported to senior management about the course of the project

Participated as a part of the team in the following projects:

- Payroll Processing
- Consultant Motivation System

Technical skills used:

- C#.Net - .Net Framework 2.0 , VSS
- MS SQL Server 2005, T-SQL, Reporting Services
- MS Access, MS Excel, XML, XSD
- Visio, N-Doc, HTML Help Workshop

Apr 2005 – Oct 2005*Analyst-Programmer***Nicotech International (Russia)***Software house***Responsibilities:****Business Analyst Capacity:**

- Participated in pre-project enterprise audit
- Prepared design documents

Software developer Capacity:

- Participated in pre-project enterprise audit, prepared design documents
- Designed and built data layers, developed representation and business layers
- Developed unit tests, reviewed the new software and fix any problems
- Provided project scheduling and time estimation

Participated as a part of the team in the following projects:

- Equipment tracking system
- Intranet solution for internal orders tracking

Technical skills used:

- C#.Net/ASP.Net - Net Framework 2.0
- MS SQL Server 2005, T-SQL
- ORACLE 9i, PL\SQL, Er-Win

Sep 2001 – Apr 2005

Analyst-Programmer

Sport Master (Russia)

Leading Sportswear Retailer

Responsibilities:

Business Analyst Capacity:

- Interviewed stakeholders
- Documented business processes
- Engaged with key users to prepare system specification
- Prepared user training material

Developer Capacity:

- Designed the system according to system specification
- Created UI and stored procedures
- Conducted testing
- Deployed the system

Technical skills used:

- Delphi 6.0, Oracle 8i, 9i, PL/SQL, VBA for MS Excel, Er-Win, UML, Visio, HTML Help Workshop

Completed projects:

- International Logistics – Shipment Tracking and Management
- International Logistics – Fiscal Accounting
