

Tanya Poletaeva

Enterprise Software Engineering | C#/.NET, SQL and Integrations

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Software engineer and technical leader with 20 years across enterprise development, data-intensive products, integrations and implementation. Experience includes hands-on C#, ASP.NET, SQL, JSON and reporting, alongside deep analysis of complex pricing and accrual rules in enterprise software.

Combines SQL performance analysis and data modelling with customer-facing solution design and practical delivery. Supported ERP integrations for New Zealand and Australian clients, established coding and review standards at Flintfox, and led CI/CD modernisation and AI-assisted legacy documentation at Gentrack.

Relevant Capabilities

- **Backend and integration work:** C#, .NET, ASP.NET, APIs, JSON, reporting and enterprise systems integration.
- **Data and performance:** SQL, T-SQL, data modelling, query performance, pricing/accrual logic and root-cause analysis.
- **Engineering practices:** solution design, code review, estimation, technical documentation and development standards.
- **Delivery tooling:** Jenkins, AWS CodeBuild, CI/CD, Azure DevOps, Jira and AI-assisted documentation and analysis.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Improved consistency through reusable documentation, training material and implementation practices.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Created user guides, solution documentation and training tools for sustainable adoption.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
