Technical Leadership | Enterprise Engineering, Mentoring and Practical AI Adoption

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Technical leader with 20 years across software development, enterprise platforms, implementation and engineering team leadership. Brings C#/.NET and SQL experience, solution design, complex problem analysis and a record of establishing coding standards and review practices.

Currently leads 6 engineers at Gentrack, where work includes CI/CD modernisation, C# capability uplift and AI-assisted legacy documentation. Combines technical direction and mentoring with customer and operational context from ERP delivery for 75+ New Zealand and Australian clients. Applies AI pragmatically, with constrained evidence retrieval and personal review in an implemented performance-review workflow.

Relevant Capabilities

- **Technical direction:** solution design, code review, development standards, estimation, risk assessment and technical documentation.
- **Mentoring and delivery:** capability uplift, delegation, coaching, quarterly planning, backlog shaping and prioritisation.
- **Enterprise engineering:** C#, ASP.NET, SQL, T-SQL, APIs, JSON, integrations and root-cause analysis.
- **Practical modernisation:** Jenkins, AWS CodeBuild, CI/CD, AI-assisted legacy analysis and evidence-based workflow design.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Designed a practical capability-uplift programme for C# adoption across the team.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop, configuring constrained Jira evidence retrieval for 6 team members and reducing preparation time from at least one working week to one day while personally reviewing and enriching every final review.
- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
