Enterprise Engineering | Practical AI Workflows, Integration and Process Improvement

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Software engineer and technical leader with 20 years across enterprise development, systems integration, implementation and team leadership. Combines C#/.NET, SQL and operational workflow analysis with practical use of AI to improve engineering and management processes.

At Gentrack, introduced AI-assisted legacy documentation and designed an AI-assisted performance-review workflow using Amazon Quick on desktop and constrained Jira evidence retrieval. Reduced preparation for 6 team members from at least one working week to one day while personally reviewing and enriching every final assessment. Brings a foundation in engineering standards, solution design, CI/CD improvement and mentoring.

Relevant Capabilities

- **Applied AI:** AI workflow design, constrained Jira evidence retrieval, human review, AI-assisted documentation and legacy analysis.
- **Enterprise integration:** C#, ASP.NET, SQL, JSON, APIs, reporting and integrations with operational systems.
- **Process improvement:** customer discovery, workflow analysis, reusable documentation, training and implementation practices.
- **Engineering leadership:** solution design, code review, development standards, mentoring, Jenkins, AWS CodeBuild and CI/CD.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop, configuring constrained Jira evidence retrieval for 6 team members and reducing preparation time from at least one working week to one day while personally reviewing and enriching every final review.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Improved consistency through reusable documentation, training material and implementation practices.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools for sustainable adoption.
- Improved implementation practices for efficiency, scalability and reliability.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
