

Tanya Poletaeva

Engineering Leadership | Product Delivery, Mentoring and Technical Direction

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Engineering leader with 20 years across software development, enterprise products, implementation and team leadership. Currently leads 6 engineers at Gentrack, guiding planning, delegation and capability development while partnering with stakeholders on product priorities.

Brings technical depth in C#/.NET, SQL and integrations, with experience translating complex customer scenarios into designs and delivery plans. Combines mentoring and engineering standards with practical improvement, including CI/CD modernisation, C# capability uplift and AI-assisted documentation and legacy-system analysis.

Relevant Capabilities

- **Leading engineers:** coaching, delegation, performance leadership, capability development and collaborative problem solving.
- **Product and customer context:** enterprise software, workflow analysis, solution design, customer discovery and implementation.
- **Technical direction:** code review, estimation, engineering standards, SQL/data reasoning and integration design.
- **Delivery improvement:** quarterly planning, prioritisation, CI/CD, AWS CodeBuild, Jenkins and AI-assisted engineering workflows.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Led 5 support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
