

Tanya Poletaeva

Technical Delivery Leadership | SQL, Data Migration and Enterprise Implementation

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Technical delivery leader with 20 years across enterprise software, SQL, implementation and team leadership. Managed ERP delivery spanning discovery, solution design, data migration, training and go-live for a platform serving 75+ New Zealand and Australian clients.

Combines detailed SQL and data reasoning with planning, stakeholder communication and coordination of technical delivery. Experience includes analysing operational workflows, translating complex customer scenarios into implementation plans, managing scope and risk, and developing reusable documentation and training to support adoption.

Relevant Capabilities

- **Migration and implementation:** ERP data migration, discovery, configuration, go-live planning, training and early-life support.
- **SQL and data analysis:** SQL, T-SQL, data modelling, query performance, data/process investigation and root-cause analysis.
- **Delivery coordination:** stakeholder management, planning, work allocation, estimation, scope, budgets, timelines and risk assessment.
- **Operational understanding:** workflow analysis, integrations, solution documentation, reusable implementation practices and team leadership.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Introduced AI-assisted documentation and analysis of legacy solutions.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Led 5 support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools for sustainable adoption.
- Improved implementation practices for efficiency, scalability and reliability.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Triaged operational requests and identified root causes.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Established coding guidelines, development standards, review practices and technical documentation.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
