

Tanya Poletaeva

Lead Database Engineer | SQL, T-SQL, Performance and Enterprise Reliability

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Technical leader with 20 years across enterprise software development, SQL-intensive products, implementation and engineering leadership. Brings long-term SQL and T-SQL experience spanning data modelling, query performance, complex pricing and accrual logic, migrations, production investigation and root-cause analysis.

Currently leads 6 engineers at Gentrack, combining hands-on technical direction with engineering standards, capability development and CI/CD modernisation. Works collaboratively across software, delivery and business teams to turn complex operational requirements into reliable, supportable solutions.

Relevant Capabilities

- **SQL engineering:** SQL, T-SQL, data modelling, query performance analysis, reporting and complex business logic.
- **Production reliability:** root-cause investigation, operational support, data integrity, migration planning and production change delivery.
- **Technical leadership:** solution design, code review, engineering standards, mentoring, estimation and risk assessment.
- **Delivery modernisation:** CI/CD, Jenkins, AWS CodeBuild, Azure DevOps, automation and technical documentation.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers, including technical direction, delegation, planning, delivery alignment and capability development.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Led 5 support analysts and software developers across work allocation, mentoring, training and delivery decisions.
- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Improved implementation practices for efficiency, scalability and reliability.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching and performance.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
