Product and Digital Delivery Leadership | Enterprise Solutions, Adoption and Team Enablement

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Product-minded technology and delivery leader with 20 years across enterprise software, digital implementation, solution design and team leadership. Currently leads 6 engineers at Gentrack, partnering with stakeholders on planning, backlog shaping, prioritisation and delivery alignment.

Previously owned end-to-end implementation and support delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients. Experienced turning complex business needs into practical solutions, coordinating cross-functional delivery, supporting adoption and improving repeatable processes. Brings technical depth in C#/.NET, SQL and integrations without relying on coding as the primary leadership tool.

Relevant Capabilities

- **Product delivery:** discovery, backlog shaping, prioritisation, requirements, solution design and implementation coordination.
- **Value and adoption:** workflow analysis, training, documentation, go-live, early-life support and continuous improvement.
- **Leadership:** stakeholder partnership, delegation, mentoring, work allocation, risk management and team capability.
- **Technology:** enterprise platforms, C#, ASP.NET, SQL, APIs, integrations, cloud ERP, CI/CD and AI-assisted analysis.

Professional Experience

Gentrack — Technical Team Lead

Jul 2025 – present | Auckland

- Leads 6 engineers across delegation, planning, delivery alignment and capability development.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Built a high-trust culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using constrained Jira evidence retrieval, reducing preparation for 6 reviews from at least one working week to one day while personally reviewing every final assessment.
- Led CI/CD modernisation from Jenkins toward AWS-based pipelines.

First Software — Head of Support / Implementation Manager

Feb 2023 – Jul 2025 | Auckland

- Owned implementation and support delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Led 5 support analysts and software developers across mentoring, training, work allocation, performance and delivery decisions.
- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software — Go-Live Manager

Dec 2020 – Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified product capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools for sustainable adoption.

First Software — Senior Consultant

Jul 2019 – Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.

Flintfox International — Team Lead

Jan 2018 – Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching and performance.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Jan 2009 – Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for enterprise products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Jan 2006 – Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education and Certifications

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.
- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
