Product and Delivery Leadership | Enterprise Platforms, AI-Assisted Delivery and Adoption

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

Product-minded technology and delivery leader with 20 years across enterprise software, implementation, solution design and team leadership. Currently leads 6 engineers at Gentrack, partnering with stakeholders on quarterly planning, backlog shaping and prioritisation while developing team capability and delivery alignment.

Previously owned end-to-end implementation and support delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients. Brings deep experience translating operational needs into requirements, practical solutions, delivery plans, training and sustainable adoption. Uses AI pragmatically to accelerate documentation, analysis and evidence-based workflows while retaining human judgement.

Relevant Capabilities

- **Product and backlog leadership:** discovery, requirements analysis, backlog shaping, prioritisation, trade-offs and delivery alignment.
- **Adoption and change:** UAT support, training, documentation, process handover, go-live and early-life support.
- **Squad leadership:** delegation, mentoring, capability development, work allocation and cross-functional coordination.
- **Technical literacy:** C#, ASP.NET, SQL, T-SQL, JSON, APIs, integrations, cloud ERP, CI/CD and legacy-system analysis.

Professional Experience

Gentrack — Technical Team Lead

Jul 2025 – present | Auckland

- Leads a team of 6 engineers across delegation, planning, delivery alignment and capability development.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation, translating product needs into practical team direction.
- Built a high-trust culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using constrained Jira evidence retrieval, reducing preparation for 6 reviews from at least one working week to one day while personally reviewing every final assessment.
- Led CI/CD modernisation from Jenkins toward AWS-based pipelines.

First Software — Head of Support / Implementation Manager

Feb 2023 – Jul 2025 | Auckland

- Owned implementation and support delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Led 5 support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software — Go-Live Manager

Dec 2020 – Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified product capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools for sustainable adoption.

First Software — Senior Consultant

Jul 2019 – Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.

Flintfox International — Team Lead

Jan 2018 – Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching and performance.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Jan 2009 – Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for enterprise products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Jan 2006 – Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education and Certifications

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.
- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
