Engineering Leadership | Mature Platforms, Team Capability and Practical Modernisation

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

People-centred engineering leader with 20 years across software development, enterprise products, implementation and team leadership. Currently leads 6 engineers at Gentrack, combining technical direction, people development, planning and delivery alignment in a complex product environment.

Brings experience balancing mature technology with practical modernisation: CI/CD uplift, C# capability development, legacy-system analysis, engineering standards and AI-assisted workflows. Previously led support, implementation and development teams and owned delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.

Leadership and Technical Capabilities

- **Engineering leadership:** technical direction, solution design, standards, code review, estimation and delivery risk.
- **People and capability:** coaching, mentoring, delegation, onboarding, performance leadership and team advocacy.
- **Modernisation:** CI/CD, Jenkins, AWS CodeBuild, legacy-system analysis, reusable practices and AI-assisted engineering.
- **Enterprise technology:** C#, .NET, ASP.NET, SQL, T-SQL, APIs, integrations, cloud ERP and Azure DevOps.

Professional Experience

Gentrack — Technical Team Lead

Jul 2025 – present | Auckland

- Leads 6 engineers across people leadership, technical direction, delegation, planning, delivery alignment and capability development.
- Built a high-trust culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins toward AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme for C# adoption.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow that reduced preparation for 6 reviews from at least one working week to one day while preserving personal review.

First Software — Head of Support / Implementation Manager

Feb 2023 – Jul 2025 | Auckland

- Led 5 support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Directed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Improved operational consistency through reusable documentation, training and implementation practices.

First Software — Go-Live Manager

Dec 2020 – Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows and coordinated solution design and delivery.

First Software — Senior Consultant

Jul 2019 – Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, identified root causes, estimated changes and implemented solutions.

Flintfox International — Team Lead

Jan 2018 – Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, technical risk, budgets, timelines, coaching, performance and recruitment support.
- Established coding guidelines, development standards, review practices and technical documentation.
- Turned complex customer scenarios into technical designs and implementation plans.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Jan 2009 – Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for enterprise products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Jan 2006 – Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education and Certifications

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.
- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
