

Tanya Poletaeva

Engineering Lead | C#.NET, People Leadership and AI-Assisted Engineering

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

People-centred engineering and technical leader with 20 years across C#.NET development, enterprise products, implementation and team leadership. Currently leads six engineers at Gentrack, combining coaching, planning and capability development with technical direction, CI/CD modernisation and legacy-system analysis.

Experienced translating complex operational needs into practical designs, engineering standards and delivery plans. Builds high-trust teams, strengthens capability through repeatable practices, and applies AI with human review and clear evidence boundaries. Earlier technical work includes complex SQL and data reasoning, enterprise integrations, solution design and long-lived product platforms.

Relevant Capabilities

- **Engineering leadership:** people leadership, coaching, delegation, performance, technical direction, delivery alignment and capability development.
- **C#.NET and enterprise systems:** C#, ASP.NET, SQL, T-SQL, APIs, integrations, cloud ERP and legacy-system analysis.
- **Engineering quality:** solution design, coding standards, code review, technical documentation, estimation, risk assessment and CI/CD modernisation.
- **AI-assisted engineering:** practical workflows for documentation, legacy analysis and evidence-based performance reviews with human oversight.
- **Stakeholder partnership:** quarterly planning, backlog shaping, prioritisation and translating complex customer and product needs into actionable plans.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop, configuring constrained Jira evidence retrieval for 6 team members and reducing preparation time from at least one working week to one day while personally reviewing and enriching every final review.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Led 5 support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Improved implementation practices for efficiency, scalability and reliability.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Microsoft Dynamics AX Development Introduction (2016)
- Using Azure for Data Platform Solutions (2017)
- HDInsight for Solution Architects (2017)
