SOFTWARE ENGINEERING MANAGER

People-centred engineering and delivery leader with 20 years across software development, enterprise product delivery, implementation and team leadership. Currently leads six engineers at Gentrack, combining people leadership, delegation, planning, stakeholder alignment and capability development with technical credibility across C#, .NET, SQL, enterprise systems, integrations and CI/CD.

Known for building high-trust teams, improving knowledge sharing, translating complex customer and product needs into practical delivery plans, and establishing repeatable engineering and implementation practices. Experienced partnering with stakeholders on priorities, coaching team members, modernising delivery pipelines and improving team capability through structured development.

RELEVANT CAPABILITIES

- Engineering team leadership and capability development
- Coaching, delegation, mentoring and performance leadership
- Quarterly planning, backlog shaping and prioritisation
- Stakeholder partnership and delivery alignment
- Engineering standards, technical documentation and knowledge sharing
- CI/CD modernisation and deployment readiness
- C#, .NET, ASP.NET, SQL and T-SQL
- Cloud ERP, enterprise product delivery and systems integration
- Legacy-system analysis and AI-assisted engineering
- Solution design, root-cause analysis and operational problem solving

PROFESSIONAL EXPERIENCE

Gentrack — Technical Team Lead

Auckland | July 2025 – Present

- Lead a team of six engineers across people leadership, delegation, planning, delivery alignment and capability development.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Partner with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme supporting C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop, with constrained Jira evidence retrieval for six team members. Reduced preparation time from at least one working week to one day while personally reviewing and enriching every final review.
- Guided delivery of CodeBuild pipelines intended to significantly reduce build and deployment time.

First Software — Head of Support / Implementation Manager

Auckland | February 2023 – July 2025

- Led five support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving more than 75 New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.

- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software — Go-Live Manager

Auckland | December 2020 – February 2023

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools to support sustainable adoption.
- Improved implementation practices for efficiency, scalability and reliability.

First Software — Senior Consultant

Auckland | July 2019 – October 2020

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International — Team Lead

Auckland | January 2018 – June 2019

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five additional 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Auckland | January 2009 – January 2018

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Moscow | January 2006 – January 2009

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

TECHNICAL TOOLKIT

C# · .NET · ASP.NET · SQL · T-SQL · JSON · APIs · Integrations · SSRS · X++ · Dynamics AX 2009/2012 · Dynamics 365 · Cloud ERP · Azure DevOps · AWS pipelines · CI/CD · Jenkins · AWS CodeBuild · Amazon Quick on desktop · Jira

EDUCATION

Bachelor's in Physics and Engineering *Moscow Engineer-Physics State University, 2008*

Certificate in Software Engineering: C# .NET *Moscow Aviation University, 2006*

CERTIFICATIONS

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications, 2008
- Microsoft Dynamics AX Development Introduction, 2016
- Using Azure for Data Platform Solutions, 2017

- HDInsight for Solution Architects, 2017
