New Zealand citizen

Professional Summary

People-centred technical leader and software professional with 20 years' experience across C#/.NET development, enterprise product delivery, complex SQL and technical team leadership. Experienced in taking complex customer and product needs through analysis, solution design, implementation and delivery across cloud ERP and trade and revenue-management platforms.

Combines hands-on technical credibility with practical technical leadership through solution design, engineering standards, code review, mentoring, delivery planning and stakeholder partnership. Recent work includes CI/CD modernisation toward AWS-based pipelines, C# capability uplift, legacy-system analysis and AI-assisted engineering workflows.

Relevant Capabilities

- C# and .NET software development
- ASP.NET, SQL and T-SQL
- Complex data analysis, data modelling and query performance
- Technical design and solution planning
- APIs, JSON and systems integration
- Code review and engineering standards
- Legacy-system analysis and modernisation
- CI/CD, Jenkins and AWS pipelines
- Technical mentoring and capability development
- Backlog shaping, prioritisation and delivery alignment
- Customer and stakeholder collaboration
- AI-assisted documentation, analysis and workflow design
- Cloud ERP, Dynamics AX and Dynamics 365

Professional Experience

Gentrack — Technical Team Lead

Auckland | July 2025 – Present

- Lead a team of six engineers across delegation, planning, delivery alignment, capability development and people leadership.
- Partner with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme to support C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop, configuring constrained Jira evidence retrieval for six team members and reducing preparation time from at least one working week to one day while personally reviewing and enriching every final review.
- Guided delivery of CodeBuild pipelines intended to cut build and deployment time significantly.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.

First Software — Head of Support / Implementation Manager

Auckland | February 2023 – July 2025

- Led five support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.

- Owned support and implementation delivery for a cloud ERP platform serving more than 75 New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Improved consistency through reusable documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software — Go-Live Manager

Auckland | December 2020 – February 2023

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools to support sustainable adoption.
- Improved implementation practices for efficiency, scalability and reliability.

First Software — Senior Consultant

Auckland | July 2019 – October 2020

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International — Team Lead

Auckland | January 2018 – June 2019

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Auckland | January 2009 – January 2018

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Moscow | January 2006 – January 2009

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Technical Toolkit

C# · .NET · ASP.NET · SQL · T-SQL · JSON · APIs · Integrations · SSRS · X++ · Dynamics AX 2009/2012 · Dynamics 365 · Cloud ERP · Azure DevOps · AWS pipelines · AWS CodeBuild · Jenkins · Amazon Quick on desktop · Jira

Education

Bachelor's in Physics and Engineering *— Moscow Engineer-Physics State University, 2008*

Certificate in Software Engineering: C# .NET *— Moscow Aviation University, 2006*

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications, 2008
- Microsoft Dynamics AX Development Introduction, 2016
- Using Azure for Data Platform Solutions, 2017
- HDInsight for Solution Architects, 2017
