Tanya Poletaeva

Technical Leadership for Research Data Systems

Auckland, New Zealand | 0210490083 | tt.korenev@gmail.com | New Zealand citizen

Profile

People-centred engineering leader with 20 years across enterprise software, implementation and team leadership. Seeking to support cancer research through reliable data and research-enabling software systems.

Currently leads six engineers at Gentrack; previously led five support analysts and developers and owned delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.

Combines SQL and enterprise integration experience with coaching, engineering standards, CI/CD improvement and translating complex needs into practical delivery plans.

Relevant capabilities

Technical team leadership | Coaching and capability development | SQL and data reasoning | Enterprise integrations | Solution design | Engineering standards and code review | CI/CD modernisation | Planning and prioritisation | Documentation and knowledge sharing

Work experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Addressed recurring story carryover through individual coaching, clear end-to-end sprint expectations and two months of structured follow-up; the engineer began completing one or two stories within each sprint, with improvement sustained well beyond the follow-up period.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Led 5 support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Improved consistency through reusable documentation, training material and implementation practices.

Earlier experience

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Established coding guidelines, development standards, review practices and technical documentation.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering** - Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET** - Moscow State Technical University of Civil Aviation, 2006.

Selected certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Using Azure for Data Platform Solutions (2017)
