Tanya Poletaeva

SQL and Data Engineering

Auckland, New Zealand | 0210490083 | tt.korenev@gmail.com | New Zealand citizen

Profile

Enterprise software professional with 20 years across development, implementation and technical leadership, seeking to contribute to cancer research through dependable data and software systems.

Brings substantial SQL/T-SQL experience in complex pricing and accrual logic, data modelling, query performance and data integrity. Previous SQL development includes stored procedures, window functions, CTEs, recursion and complex transformations.

Combines hands-on SQL, reporting and integration experience with ERP data migration and translating operational requirements into technical solutions. Currently leads six engineers at Gentrack.

Relevant capabilities

SQL and T-SQL | Stored procedures | Window functions and recursive CTEs | Relational data modelling | Query performance analysis | Data migration and integrity | Reporting and SSRS | APIs and integrations | C# and ASP.NET

Work experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers, including people leadership, delegation, planning, delivery alignment and capability development.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

Earlier experience

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering** - Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET** - Moscow State Technical University of Civil Aviation, 2006.

Selected certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications (2008)
- Using Azure for Data Platform Solutions (2017)
