July 1995– May 1998	Senior Secondary School #63, Khabarovsk/Russia

PERSONAL CHARACTERISTICS

I am naturally an outgoing person, enjoy working with children.

Disciplined and organized.

Team-player, patient and caring.

Creative with an attitude to progress and always learning something new.

Consider myself an artistic person: can dance and sing, love drawing. Reading a story-books for the kids in a “role-playing mode” is one of my favorites!

Having an experience of living in three different countries, with such a rich and distinct history and culture gave me a great opportunity to learn many different things in multiple areas of life.

My working experience covers many different areas as well. But what connects it all is: communication with people and cultural aspect. Those two are a very important part of my life and my personality.

Since I was a kid I have been singing and playing piano even in my University years I continued my connection to music being a part of Jazz band in between the studies. Music is a big part of my life continue to these days. I love art in all of its manifestations as well.

During my University years I went to Japan as an exchange student between my University and the University of Niigata city. That was my first acquaintance with this beautiful country and I fell in love with an amazing traditions and exceptional culture of Japan straight away. I spent almost a month in a Japanese family and since then Japan had a very special place in my heart.

After my graduation I worked in a field of my Specialization as Manager of the Outbound Department mostly for the Asian routes such as Japan, China, Indonesia and Malaysia. That sparkled my interest to know more about culture and traditions of those countries. So eventually I moved to Japan and started a family here.

For a while my professional life switched to the Motherhood, which I suppose the most beautiful and fulfilling experience in my life. To me parenthood is a great opportunity to grow with our kids. As it opens so many possibilities to discover so much about ourselves and the world we live in through the eyes of our kids.

When our family moved to New Zealand I worked part-time in a Primary School my daughter was attending as an assistant for an after-school care. It was a bit hard for her to adjust to a new country so it was perfect to help the school as well as helping my daughter feeling safe and get used to a new environment faster. And it turned out to be a very nice experience in the end. As I always felt that it was very natural to me to connect with kids, as well as my love for art and music, that we were adding to the activities, all that was a very heart fulfilling combination for me.

When our family came back to Japan I started to work as a tour guide which was a chance to study more about the history and culture of Japan, that was always one of the main points of interest of mine, plus, that was a chance to literally be in a close proximity of it, working in an Ancient Capitals such as Nara and Kyoto.

But the latest happenings in the world stopped the tourism in Japan so here I am again finding where I could be of a help and where my talents would serve better. So, I thought to continue working with kids would be worthwhile new chapter and would be grateful if you let me be a part of your team. I will do my best to make every day of our work together a fresh, heartwarming and inventive experience for both kids and stuff where we can grow and nurture each other while studying.

Looking forward to hearing from you to get to know each other better!

Thank you for your time!
