

Cover Letter - Operations Support Specialist, BTG Ltd

Dear Hiring Manager,

I am currently working as an Operations & Business Support Coordinator at Mindhive in Auckland. My work covers procurement, quoting, billing support, and day-to-day operational coordination in a technical environment.

I regularly manage supplier communication, quote collection, purchase orders, invoice follow-up, and delivery tracking. I also support finance administration using Xero and Dext. This is practical, detail-focused work, and accuracy matters every day.

I enjoy being the connector across teams. At Mindhive, I liaise with internal teams, suppliers, contractors, and service providers to keep workflows moving and resolve issues quickly. I also support documentation and process improvements when we see opportunities to make operations smoother.

Before this, I led operations and programme coordination at Marie International School during a period of rapid growth. I coordinated scheduling for 20+ staff, maintained operational records and compliance documents, and handled high-volume stakeholder communication. That experience strengthened my ability to stay organised while supporting multiple priorities.

I understand MSP and Microsoft licensing exposure is an advantage in this role. While I have not held a dedicated licensing specialist title, I do bring strong experience in billing lifecycle support, procurement coordination, vendor management, and operational follow-through in technology-adjacent work.

I am very interested in this opportunity at BTG because it combines service delivery support, billing and licensing coordination, and process improvement in a collaborative team. I would value the chance to contribute to your senior operations team and help keep delivery accurate, reliable, and well coordinated.

Warm regards,

Inna Popova
