

Cover Letter - Project Coordinator, Consult Recruitment (IT & Digital)

Dear Hiring Manager,

I am applying for the Project Coordinator role in Auckland. I currently work as an Operations & Business Support Coordinator at Mindhive, a New Zealand AI technology company. In this role, I support delivery-focused teams through schedule-aware coordination, supplier and contractor communication, and accurate documentation across operational workflows.

I bring practical experience that matches your core needs: coordinating activities across teams, maintaining clear reporting, and keeping documentation accurate and audit-ready. At Marie International School, I coordinated 10+ cross-campus programmes and maintained 30+ operational documents, records, and compliance registers during a period of rapid growth. I also managed scheduling and workflow coordination for 20+ staff and acted as a key liaison across leadership, staff, parents, partners, and suppliers.

I have not held the exact job title of Project Coordinator. However, I have consistently delivered project support work in service delivery environments, including milestone-oriented coordination, stakeholder communication, issue follow-up, and process consistency. I also work with Microsoft Office, Google Workspace, Slack, and Jira in day-to-day coordination.

What interests me about this opportunity is the focus on project standards, governance, and dependable delivery support across internal teams, customers, vendors, and contractors. That combination is closely aligned with the way I work and the value I aim to bring.

Thank you for your time and consideration.

Warm regards,

Inna Popova
