

Cover Letter - Office Manager

Dear Bridgette,

I am applying for the Office Manager role for your private investment client in Auckland CBD. I currently work as an Operations & Business Support Coordinator at Mindhive in Auckland, where I support office operations, procurement, finance administration, facilities, and day-to-day coordination across teams.

In my current role, I manage supplier communication, quote collection, purchase order preparation, invoice follow-up, and delivery tracking. I also support accounts coordination through invoice management and quote tracking in Xero and Dext. This is practical, hands-on work, and it matches your need for someone who can keep a boutique office running smoothly and professionally.

Before this, I was Operations & Programme Coordination Lead and Head Administrator at Marie International School in Japan during a period of rapid growth. I coordinated daily operations, scheduling and workflows for 20+ staff, maintained 30+ operational and compliance documents, and acted as a key liaison across leadership, staff, partners, and families. I also supported event coordination and marketing-related materials, including website and branded communications.

While private investment is a new sector for me, the core requirements of this role are familiar: high-trust support, strong organisation, discretion, and calm frontline communication. I enjoy helping senior professionals stay focused by making sure operations, documentation, and coordination are handled reliably.

Thank you for considering my application. I would value the opportunity to contribute to a respectful, high-performing team and support the office with care and consistency.

Warm regards,

Inna Popova
