

Cover Letter - Job Coordinator, Watercare Services Limited

Dear Hiring Manager,

I am writing to apply for the Job Coordinator role at Watercare. I am currently working in Auckland as an Operations & Business Support Coordinator at Mindhive, where I support fast-moving operational workflows across administration, procurement coordination, documentation, and cross-team communication.

In my current role, I coordinate supplier and contractor activity, track work through quote, purchase order, and invoice stages, and help keep day-to-day operations running smoothly. This work requires clear prioritisation, strong attention to detail, and consistent follow-up when timelines are tight.

Before this, I led operations and programme coordination at Marie International School during a period of rapid growth. I managed scheduling and workflow coordination for 20+ staff, maintained operational and compliance documentation, and acted as a key liaison across leadership, staff, families, partners, and suppliers. Handling high enquiry volumes while keeping communication clear and structured has been a core part of my work.

I am especially interested in Watercare because this role combines dispatch coordination, service-focused administration, and stakeholder communication in a team that supports essential services for Auckland. I would value the opportunity to contribute my coordination strengths, calm delivery style, and practical operational support experience to your Maintenance Services team.

Warm regards,

Inna Popova

Cover Letter - Job Coordinator, Watercare Services Limited

Dear Hiring Manager,

I work in Auckland as an Operations & Business Support Coordinator at Mindhive. The role is practical and responsive: keep operational workflows organised, coordinate suppliers and contractors, track purchasing follow-up, and support finance administration with care.

The part of your Job Coordinator posting that matches me most is the blend of coordination and administration under pressure. For four years at Marie International School in Japan, I coordinated operations through rapid growth. I aligned schedules for more than twenty staff across sites, kept operational registers accurate, and stayed the main point of contact for a mix of leadership, partners, and suppliers. When several urgent needs land at once, I focus on priorities, communicate clearly, and keep records clean.

I have not worked in water utilities maintenance dispatch. I have worked in fast operational environments where timing, safety culture, and stakeholder expectations matter. I learn operational systems quickly when the logic is clear and the team explains how work is meant to flow.

Watercare's scale and long-term investment story also appeal to me. Public infrastructure work is serious coordination work. I would like to be part of a team keeping service delivery steady for Tāmaki Makaurau.

Thank you for your time and consideration.

Warm regards, Inna Popova 027-392-0067 innapv@gmail.com
