ENGINEERING AND TECHNOLOGY DELIVERY LEADER

People Leadership | Engineering Standards | Delivery Excellence

PROFESSIONAL SUMMARY

People-centred engineering and delivery leader with 20 years across software development, enterprise product delivery, implementation and team leadership. Experienced leading engineers, translating complex customer and product needs into technical direction, practical delivery plans and reliable solutions across cloud ERP and trade and revenue management platforms. Currently leads 6 engineers at Gentrack. Previously managed support, implementation and development teams and owned customer delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients. Known for empathetic people leadership, structured problem solving, clear engineering standards, stakeholder partnership and improving team capability through coaching and repeatable practices.

CORE STRENGTHS

- Engineering team leadership and capability development
- Delivery planning, prioritisation and execution
- Technical direction and solution assessment
- Engineering standards, code review and documentation
- CI/CD modernisation and delivery automation
- Systems thinking and structured problem solving
- Stakeholder alignment and cross-functional collaboration
- Delivery governance and risk assessment
- Customer-focused implementation and operational adoption
- Responsible use of AI-assisted engineering and analysis tools

SELECTED ENGINEERING LEADERSHIP AND DELIVERY EVIDENCE

- Led teams of 5-7 people across engineering, testing, support and implementation, including coaching, performance support, work allocation and delivery accountability.
- Owned end-to-end ERP implementation and support delivery for 75+ clients, connecting customer discovery, technical solution design, workflow configuration, training and successful operational adoption.
- Established development guidelines, review practices and documentation standards that improved consistency and quality across a delivery team.
- Modelled highly complex pricing and accrual rules across hundreds of real-world scenarios, combining domain understanding with technical solution design.
- Led capability and tooling improvements at Gentrack, including C# enablement and CI/CD modernisation, using structured learning, stakeholder alignment and incremental adoption.

PROFESSIONAL EXPERIENCE

Technical Team Lead | Gentrack, Auckland

July 2025 - Present

- Lead a team of 6 engineers in a complex enterprise product environment, with responsibility for people leadership, delegation, planning, delivery alignment and capability development.
- Built a high-trust team culture with stronger knowledge sharing, smoother team processes and more spontaneous collaboration across engineers and stakeholders.
- Partner with stakeholders on quarterly planning, backlog shaping and prioritisation, translating changing priorities into clearer, achievable work for the team.
- Led delivery of CI/CD modernisation from Jenkins towards AWS-based pipelines, coordinating the change from planning through adoption and improving build and deployment readiness.
- Designed a structured capability uplift approach for C# adoption, breaking learning into practical tasks and enabling each engineer to apply new skills in the product environment.
- Introduced and led an AI-assisted approach to documenting and understanding legacy solutions.

Head of Support / Implementation Manager | First Software, Auckland

February 2023 - July 2025

- Led a mixed team of 5 support analysts and software developers, covering onboarding, mentoring, training, work allocation, performance management and day-to-day delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients, balancing customer outcomes, operational risk and team capacity.
- Managed the full implementation lifecycle: customer discovery, solution design and validation, workflow configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Worked directly with business owners and operational users to analyse scenarios, clarify underlying needs, assess solution options and translate decisions into deliverable work.
- Improved consistency through reusable documentation, training material and implementation practices, while supporting complex integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

Go-Live Manager | First Software, Auckland

December 2020 - February 2023

- Led ERP go-live programmes from initial client workshops through configuration, change delivery, user training, launch and early-life support.
- Analysed client operating needs and existing workflows, identified the appropriate ERP capability, defined required changes and coordinated solution design and delivery.
- Showcased proposed and completed changes with stakeholders, incorporated feedback and supported validation before production adoption.
- Created user guides, solution documentation and training tools to support knowledge transfer, operational readiness and sustainable adoption.
- Drove continuous improvement in implementation practices with a focus on efficiency, scalability, reliability and clearer customer outcomes.

Senior Consultant | First Software, Auckland

July 2019 - October 2020

- Partnered with clients to understand delivery needs, explain product capability, investigate data and process issues, estimate changes and implement agreed solutions.
- Combined customer-facing solution design with hands-on engineering across C#, ASP.NET, SQL, reporting, JSON and integrations, including Xero integration.
- Triaged operational requests, identified root causes and prioritised practical responses while maintaining clear communication with customers.

Team Lead | Flintfox International, Auckland

January 2018 - June 2019

- Led a development and test pod, managing work allocation, scope, risk assessment, budgets, timelines, coaching, performance and recruitment support.
- Worked with clients and consultants to clarify delivery needs, review functional designs, estimate work and turn complex scenarios into technical designs and implementation plans.
- Established and improved coding guidelines, development standards, review practices and technical documentation to lift consistency and delivery quality.
- Led delivery of Component Switch pricing functionality and more than five other 200+ hour projects on schedule.
- The team was recognised as the highest-performing team in two consecutive performance reviews.

Senior Software Developer | Flintfox International, Auckland

2009 - January 2018

- Analysed and modelled complex pricing and accrual business rules for Trade and Revenue Management products across Dynamics AX 2009/2012 and Dynamics 365.
- Designed solution logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks across hundreds of real-world scenarios.
- Used structured problem solving and SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations, including Wirtz go-live work and the ShopDirect Dynamics 365 implementation in the United Kingdom.

C# .NET Developer | RAA Spectekhnika / Bio-Rad-related work, Moscow

2006 - 2009

- Developed C#/.NET software in technical domains including aviation simulator systems and software connected with blood and plasma analysis workflows.

METHODS AND TECHNICAL TOOLKIT

- Agile planning, customer discovery, solution analysis and design, implementation, go-live and support
- Risk assessment, estimation, prioritisation, training, documentation and stakeholder reporting
- C#, ASP.NET, SQL/T-SQL, JSON, APIs, integrations, SSRS and X++
- Dynamics AX 2009/2012, Dynamics 365 and cloud ERP platforms
- Azure DevOps, AWS pipeline exposure, CI/CD modernisation, source control and peer review
- Practical daily use of AI-assisted tools for analysis, drafting, learning and delivery support, with human review and accountability

EDUCATION AND CERTIFICATIONS

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008
 - **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006
 - **Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications**, 2008
 - **Microsoft Dynamics AX Development Introduction**, 2016
 - **Using Azure for Data Platform Solutions**, 2017
 - **HDInsight for Solution Architects**, 2017
