

Tanya Poletaeva

Technical Lead | C#/.NET, SQL and Enterprise Product Engineering

Auckland, New Zealand | 021 049 0083 | tt.korenev@gmail.com | New Zealand citizen

Professional Summary

- People-centred technical leader with 20 years across software development, enterprise product engineering, solution design, implementation and team leadership.
- Combines C#/.NET and deep SQL experience with practical technical direction, engineering standards, code review, estimation and complex problem solving.
- Currently leads 6 engineers at Gentrack, shaping delivery priorities, modernising CI/CD practices and building team capability in C# and legacy-system analysis.
- Experienced translating complex product and customer scenarios into maintainable designs and delivery plans across SaaS ERP and trade and revenue management platforms.
- Known for clear thinking, high-trust collaboration and improving engineering capability without relying on sustained overwork.

Core Capabilities

- **Engineering:** C#, .NET, ASP.NET, SQL, T-SQL, JSON, APIs, integrations and enterprise application development.
- **Technical leadership:** solution design, technical direction, code review, engineering standards, estimation, risk analysis and mentoring.
- **Platforms and delivery:** cloud ERP, Dynamics AX/Dynamics 365, Azure DevOps, AWS CodeBuild, Jenkins and CI/CD modernisation.
- **Data and problem solving:** relational data modelling, complex query design, performance analysis, root-cause investigation, pricing and accrual logic.
- **Team effectiveness:** delegation, capability development, knowledge sharing, backlog shaping, prioritisation and sustainable delivery.

Professional Experience

Gentrack - Technical Team Lead

Jul 2025 - present | Auckland

- Leads a team of 6 engineers across technical direction, delegation, planning, delivery alignment and capability development.
- Partners with stakeholders on quarterly planning, backlog shaping and prioritisation, translating complex product needs into practical team direction.
- Led CI/CD modernisation from Jenkins toward AWS-based pipelines, improving build and deployment readiness.
- Designed a practical capability-uplift programme to strengthen C# adoption across the engineering team.
- Introduced AI-assisted documentation and analysis of legacy solutions, improving access to system knowledge.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop and constrained Jira evidence retrieval, reducing preparation for 6 reviews from at least one working week to one day while personally reviewing and enriching every final review.
- Built a high-trust culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.

First Software - Head of Support / Implementation Manager

Feb 2023 - Jul 2025 | Auckland

- Led 5 support analysts and software developers across mentoring, training, work allocation, performance and delivery decisions.
- Owned implementation delivery for a cloud ERP platform serving 75+ New Zealand and Australian clients.
- Directed discovery, solution design, configuration, customisation, reporting, data migration, training and go-live delivery.
- Improved consistency and scalability through reusable technical documentation, training material and implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software - Go-Live Manager

Dec 2020 - Feb 2023 | Auckland

- Led ERP go-live programmes from workflow analysis and configuration through change delivery, training, launch and early-life support.
- Analysed operational requirements, identified product capability and coordinated solution design and delivery.
- Improved implementation practices for efficiency, scalability and reliability.

First Software - Senior Consultant

Jul 2019 - Oct 2020 | Auckland

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, identified root causes, estimated changes and implemented agreed solutions.

Flintfox International - Team Lead

Jan 2018 - Jun 2019 | Auckland

- Led a development and test pod across work allocation, scope, technical risk, budgets, timelines, coaching and performance.
- Converted complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than 5 other projects exceeding 200 hours each on schedule.
- Led the highest-performing team in 2 consecutive performance reviews.

Flintfox International - Senior Software Developer

Jan 2009 - Jan 2018 | Auckland

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for enterprise Trade and Revenue Management products.
- Designed product logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work - C# .NET Developer

Jan 2006 - Jan 2009 | Moscow

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

- **Bachelor's in Physics and Engineering**, Moscow Engineer-Physics State University, 2008.
- **Certificate in Software Engineering: C# .NET**, Moscow Aviation University, 2006.

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications, 2008.
- Microsoft Dynamics AX Development Introduction, 2016.
- Using Azure for Data Platform Solutions, 2017.
- HDInsight for Solution Architects, 2017.
