Principal / Lead Engineer

People-centred engineering and delivery leader with 20 years across software development, enterprise product delivery, implementation and team leadership. Combines hands-on experience in C#/.NET, ASP.NET, SQL/T-SQL, APIs, integrations and complex enterprise business logic with technical leadership, engineering standards and team capability development.

Experienced in translating complex customer and product needs into practical technical direction, delivery plans and reliable solutions. Strong background in complex SQL analysis, data integrity, legacy-system understanding, CI/CD modernisation, solution design and mentoring engineers. Currently leads six engineers at Gentrack.

Relevant capabilities

- C#/.NET, ASP.NET and enterprise software development
- SQL Server, SQL and T-SQL analysis, data modelling and query performance
- APIs, JSON, integrations, reporting and complex business logic
- Technical design, solution design and legacy-system analysis
- CI/CD modernisation, Jenkins, AWS pipelines and Azure DevOps
- Engineering standards, code review, documentation and repeatable practices
- Technical leadership, mentoring, delegation and capability development
- Backlog shaping, prioritisation, estimation and delivery alignment
- Root-cause analysis, data integrity and operational problem solving
- AI-assisted documentation, analysis and evidence-based workflows

Professional experience

Gentrack — Technical Team Lead

Auckland · Jul 2025–Present

- Lead a team of six engineers across people leadership, delegation, planning, delivery alignment and capability development.
- Partner with stakeholders on quarterly planning, backlog shaping and prioritisation, translating product and delivery needs into practical engineering direction.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Led CI/CD modernisation from Jenkins to AWS-based pipelines, improving build and deployment readiness.
- Guided delivery of CodeBuild pipelines intended to cut build and deployment time significantly.
- Designed a practical capability-uplift programme for C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions to improve understanding of existing systems.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop, with constrained Jira evidence retrieval for six team members. Reduced preparation time from at least one working week to one day while personally reviewing and enriching every final review.

First Software — Head of Support / Implementation Manager

Auckland · Feb 2023–Jul 2025

- Led five support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.
- Owned support and implementation delivery for a cloud ERP platform serving more than 75 New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Improved consistency through reusable documentation, training material and implementation practices.

- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software — Go-Live Manager

Auckland · Dec 2020–Feb 2023

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools for sustainable adoption.
- Improved implementation practices for efficiency, scalability and reliability.

First Software — Senior Consultant

Auckland · Jul 2019–Oct 2020

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International — Team Lead

Auckland · Jan 2018–Jun 2019

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other 200+ hour projects on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Auckland · Jan 2009–Jan 2018

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Moscow · Jan 2006–Jan 2009

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Technical toolkit

C# · .NET · ASP.NET · SQL · T-SQL · JSON · APIs · integrations · SSRS · X++ · Dynamics AX 2009/2012 · Dynamics 365 · cloud ERP · Azure DevOps · AWS pipelines · CI/CD · Jenkins · Amazon Quick on desktop · Jira

Education

Bachelor's in Physics and Engineering *— Moscow Engineer-Physics State University, 2008*

Certificate in Software Engineering: C# .NET *— Moscow Aviation University, 2006*

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications, 2008
- Microsoft Dynamics AX Development Introduction, 2016
- Using Azure for Data Platform Solutions, 2017
- HDInsight for Solution Architects, 2017
