Technical Team Lead | Engineering Manager | Delivery Leader

People-centred engineering and delivery leader with 20 years across software development, enterprise product delivery, implementation and team leadership. Currently leads six engineers at Gentrack across delegation, planning, delivery alignment and capability development. Experienced translating complex customer and product needs into practical technical direction, delivery plans and reliable enterprise solutions.

Known for empathetic people leadership, clear engineering standards, structured problem solving and stakeholder partnership. Brings technical credibility across C#, ASP.NET, SQL/T-SQL, integrations, cloud ERP, legacy-system analysis and CI/CD modernisation.

Core capabilities

- Engineering team leadership and capability development
- Delegation, coaching, mentoring and performance leadership
- Quarterly planning, backlog shaping and prioritisation
- Delivery alignment, estimation and risk assessment
- Stakeholder partnership and customer-focused solution design
- C#, ASP.NET, SQL, T-SQL, JSON and APIs
- Enterprise software, cloud ERP and systems integration
- CI/CD modernisation, Jenkins and AWS pipelines
- Legacy-system analysis and technical documentation
- Data modelling, stored procedures and query performance
- Support, implementation, go-live and operational problem diagnosis

Professional experience

Gentrack — Technical Team Lead

Auckland | July 2025–Present

- Lead a team of six engineers, covering people leadership, delegation, planning, delivery alignment and capability development.
- Built a high-trust team culture with stronger knowledge sharing, smoother processes and spontaneous collaboration.
- Partner with stakeholders on quarterly planning, backlog shaping and prioritisation.
- Led CI/CD modernisation from Jenkins toward AWS-based pipelines, including guidance for CodeBuild pipelines intended to reduce build and deployment time significantly.
- Designed a practical capability-uplift programme supporting C# adoption across the team.
- Introduced AI-assisted documentation and analysis of legacy solutions.
- Designed an AI-assisted performance-review workflow using Amazon Quick on desktop and constrained Jira evidence retrieval for six team members. Reduced preparation time from at least one working week to one day while personally reviewing and enriching every final review.
- Addressed recurring story carryover through individual coaching, clearer end-to-end sprint expectations and two months of structured follow-up. The engineer subsequently completed one or two stories within each sprint, with improvement sustained beyond the follow-up period.
- Use an agent harness with the engineering team to develop and test features.

First Software — Head of Support / Implementation Manager

Auckland | February 2023–July 2025

- Led five support analysts and software developers across onboarding, mentoring, training, work allocation, performance and delivery decisions.

- Owned support and implementation delivery for a cloud ERP platform serving more than 75 New Zealand and Australian clients.
- Managed discovery, solution design, configuration, customisation, reporting, data migration, training, go-live and post-go-live support.
- Improved consistency through reusable documentation, training material and repeatable implementation practices.
- Supported integrations including EFTPOS NZ, Courier Post, NZ Post and Xero.

First Software — Go-Live Manager

Auckland | December 2020–February 2023

- Led ERP go-live programmes from client workshops through configuration, change delivery, training, launch and early-life support.
- Analysed operating needs and workflows, identified ERP capability and coordinated solution design and delivery.
- Created user guides, solution documentation and training tools to support sustainable adoption.
- Improved implementation practices for efficiency, scalability and reliability.

First Software — Senior Consultant

Auckland | July 2019–October 2020

- Combined customer-facing solution design with hands-on C#, ASP.NET, SQL, reporting, JSON and integration work.
- Investigated data and process issues, estimated changes and implemented agreed solutions.
- Triaged operational requests and identified root causes.

Flintfox International — Team Lead

Auckland | January 2018–June 2019

- Led a development and test pod across work allocation, scope, risk, budgets, timelines, coaching, performance and recruitment support.
- Turned complex customer scenarios into technical designs and implementation plans.
- Established coding guidelines, development standards, review practices and technical documentation.
- Delivered Component Switch pricing and more than five other projects involving over 200 hours of work on schedule.
- Led the highest-performing team in two consecutive performance reviews.

Flintfox International — Senior Software Developer

Auckland | January 2009–January 2018

- Modelled complex pricing and accrual rules across hundreds of real-world scenarios for Trade and Revenue Management products.
- Designed logic for Stepped Breaks, Payment Sync, GL Resolve, Free Goods and Price Breaks.
- Used SQL performance analysis to improve data integrity, product behaviour and processing efficiency.
- Supported developers and customer implementations across locations.

RAA Spectekhnika / Bio-Rad-related work — C# .NET Developer

Moscow | January 2006–January 2009

- Developed C#/.NET software for aviation simulator systems and blood and plasma analysis workflows.

Education

Bachelor's in Physics and Engineering *— Moscow Engineer-Physics State University, 2008* ***Certificate in Software Engineering: C# .NET*** *— Moscow State Technical University of Civil Aviation, 2006*

Certifications

- Microsoft Certified Technical Specialist: .NET Framework 2.0 Application Development and Windows Applications, 2008
- Microsoft Dynamics AX Development Introduction, 2016
- Using Azure for Data Platform Solutions, 2017

- HDInsight for Solution Architects, 2017

Technical toolkit

C# · ASP.NET · SQL · T-SQL · JSON · APIs · integrations · SSRS · X++ · Dynamics AX 2009/2012 · Dynamics 365 · cloud ERP · Azure DevOps · AWS pipelines · CI/CD · Jenkins · Amazon Quick on desktop · Jira · stored procedures · window functions · CTEs · recursive queries
